DETAILED ACTION

Response to Amendment

1. This office action is in response to Applicant's amendment filed 3/15/11. Claims 43, 72, 79-97, 99-103, 105-107, 125, 126, 132 and 134 have been amended. Claims 127, 130 and 133 have been canceled. Claims 21-39, 41-45, 47-68, 70-74, 76-97, 99-103, 105-107, 123-126, 128, 129, 131, 132 and 134 are pending.
2. The previously pending objections to claims 126, 127, 129, 130, 132 and 133 have been withdrawn.

The previously pending rejection to claims 79-97, 99-103, 105-107, 125 and 132-134 under 35 U.S.C. 101, have been withdrawn.

Drawings

3. The drawings are objected to because figures 7-12, 12A, 12B, and 12C contain mostly shaded black areas. Black and white drawings are required. See MPEP §608.02.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from

the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Reasons for Allowance

4. Claims 21-39, 41-45, 47-68, 70-74, 76-97, 99-103, 105-107, 123-126, 128, 129, 131, 132 and 134 are allowed.

5. The following is an examiner's statement of reasons for allowance:

With respect to independent claims 21, 50 and 79, none of the prior art of record, taken individually or in any combination, teach inter alia, (g) graphically presenting to the user via the display device the impact of the adjustment by again presenting simultaneously the image of the one of the selected goals as adjusted and the images of the remaining goals as impacted, wherein graphically presenting the impact of the adjustment comprises altering the appearance of a picture of the one of the remaining goals to reflect an inverse relationship between the time indicia or the quality indicia of the adjusted goal and the time indicia or the quality indicia of the

one of the remaining goals, and to display an extent of the impact on the one of the remaining goals by displaying the picture of the one of the remaining goals adjusted to reflect the impacted time period or the impacted quality, and wherein altering the appearance of the picture comprises at least one of the following: changing a level of transparency of a display of the picture to reflect an adjusted priority of the one of the remaining goals, changing the level of transparency of the display of the picture to reflect an adjusted amount of time expected to achieve the one of the remaining goals, and replacing the picture with another picture of the one of the remaining goals and representative of an adjusted expensiveness of the one of the remaining goals.

6. The prior art references most closely resembling Applicant's claimed invention are Jones et al. (U.S. 6,021,397) and Maggioncalda et al (USPN 5,918,217).

Jones et al teaches a financial advisory system 100, including client computer 105, figure 1, wherein personal information about the user is obtained included information about the user's cash flow, wherein the plurality of goals are presented to the user. These goals include savings goals, retirement goals, financial plans (buying a house, sending a child to school), etc., (see column 2, lines 48-64, column 3, lines 40-67, column 4, lines 10-34, column 5, lines 50-67, column 6, lines 3-40 and 50-58, column 7, lines 63-67, and column 8, lines 1-20). Jones et al also disclose an LCD for displaying graphically depictions of expected portfolio performance, asset allocation, etc., including charts presented to the user indicating

retirement age probabilities, i.e., time frame for achieving the goal, column 7, lines 36-43, wherein the user can select at least one goal and iteratively adjust preferences related to the goals, wherein certain financial goals, such as particular retirement standard of living, accumulating a down payment for the purchase of a house, or saving enough money to send a child to college, column 4, lines 27-33, and wherein the system analyzes the effects of the changes on the other goals and preferences in the portfolio, see column 2, lines 48-64, column 3, lines 40-67, column 5, lines 50-67, column 6, lines 3-40 and 50-58, column 7, lines 63-67, and column 8, lines 1-20.

Maggioncalda et al disclose presenting a number of different output values in area 420, users are given the ability to focus on whatever output values that may appeal to them, wherein this section of the advice screen 400 may be adaptive, that is, a user may select to have displayed one or more output values that are relevant to satisfying his/her objective function, and graphical representations of the recommended financial products are grouped together in a predefined portion of the display that is separate from the decisions and the output values, column 9, lines 9-15 and 29-62 and figure 4. Maggioncalda et al also disclose a Retirement Forecast cloud picture, i.e., 24%, in figure 4, is altered in a pictorial fashion using certain icons to represent certain levels of probability of achieving goals, wherein icons 760-769 each include one or more of five basic elements: sky, clouds, sun, sun rays, and a numeric forecast, that display of the basic elements depending on the likelihood of achieving the goal 720, wherein the likelihood of achieving the goal 720 increases

the weather outlook becomes brighter, e.g., icon 760 includes a dark storm cloud and represents less than a 5% chance of the goal being achieved, and the sun begins to peek out from behind the cloud in icon 765 which represents a 50% chance of achieving the goal, column 13, lines 1-42 and figure 7c.

However, none of the cited prior art, taken individually or in any combination, teach inter alia, the limitations discussed above with respect to independent claims 21, 50 and 79.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
